Bilgin Yazar, Msc
Founder & CEO
ETGi Grup is an IT company located in Turkey expert on e-learning tech, systems and services.

Etgi Grup developed to you Vedubox - Virtual Education Box which is an easy way of e-learning!

VeduBox is an Innovative Integrated Learning Management System (LMS) to make cloud-based online learning and training better for everyone. It’s easy to set up, completely customizable, and totally secure. It’s flexible enough to handle as many learners as you need it to – and robust enough to deliver detailed tracking and reporting on each and every one of them.

Project Services

01 Mobile MOOC Platform Service for Governments, Organizations etc

02 Mobile e-Learning Service for Schools, Edu Customers, Companies etc

03 Mobile Learning Service for Tutors
Main Idea
Enable any government institution, company or anyone to establish online education, online training system on the internet with their identity.

Added Value
Reduce the investment for e-Learning infrastructure and enable organizations/edu to more concentrated on teaching and learning.

Why I participate an e-learning platform service project?
e-Learning is one the leading area which is growing very well. However infrastructure are not satisfactory and well integrated with latest technologies to provide ready services.

Cloud Mobile SAAS
Good way to provide services with customer identity, securely, economically as well as integrated latest technologies with high performance.
The platform enables any institution, company or anyone to establish online education, online training system on the internet with their identity.

The platform is an Innovative Integrated Learning Management System (LMS) to make cloud-based online learning and training better for everyone. It's easy to set up, completely customizable, and totally secure. It's flexible enough to handle as many learners as you need it to – and robust enough to deliver detailed tracking and reporting on each and every one of them.

The platform’ customers include corporates, and training, education companies as well as tutors. We work with clients internationally providing solutions to their training and eLearning needs.

The platform provide services for organizations looking to train their employees, partners, and customers using Web-based training or mobile-based training.
