Create a new generation of care

1. Collaboration between ICT, IoT and e-health to enable a more viable life and increase the time at home

2. Existing technology – the innovation lies in the creation of the technical solution that brings it together

3. Will drive towards a new standard, give companies a competitive edge, offer a great network and generate a lot of data for research

Vision & Solution Approach

THE FUTURE

Monitoring & Self-care

Proactivity

Elderly to live at home
Patients to stay at home

Everybody wins!

TECHNICAL SOLUTION

- Modularity
- Standardization
- Flexibility

Using existing technology to create a new service delivery framework that will create a more attractive solution for external stakeholders.
Project Plan

We will **prove and materialize** our concept by using the modularity of the eco-system and service delivery framework to deliver services for selected **use cases**
