

CELTIC-NEXT Online Proposers Day

29th November 2018, via WebEx

Pitch of the Project Proposal

Smart Streams

<Müge Kural>
<info@eteration.com>

Teaser

- Self-learning reactive events for IoT
- Enable to process large volume data in embedded environments
- Deep learning assistance
- Easy to integrate any devices

Organisation Profile

Eteration

Experienced in building enterprise software solutions and infrastructures built on

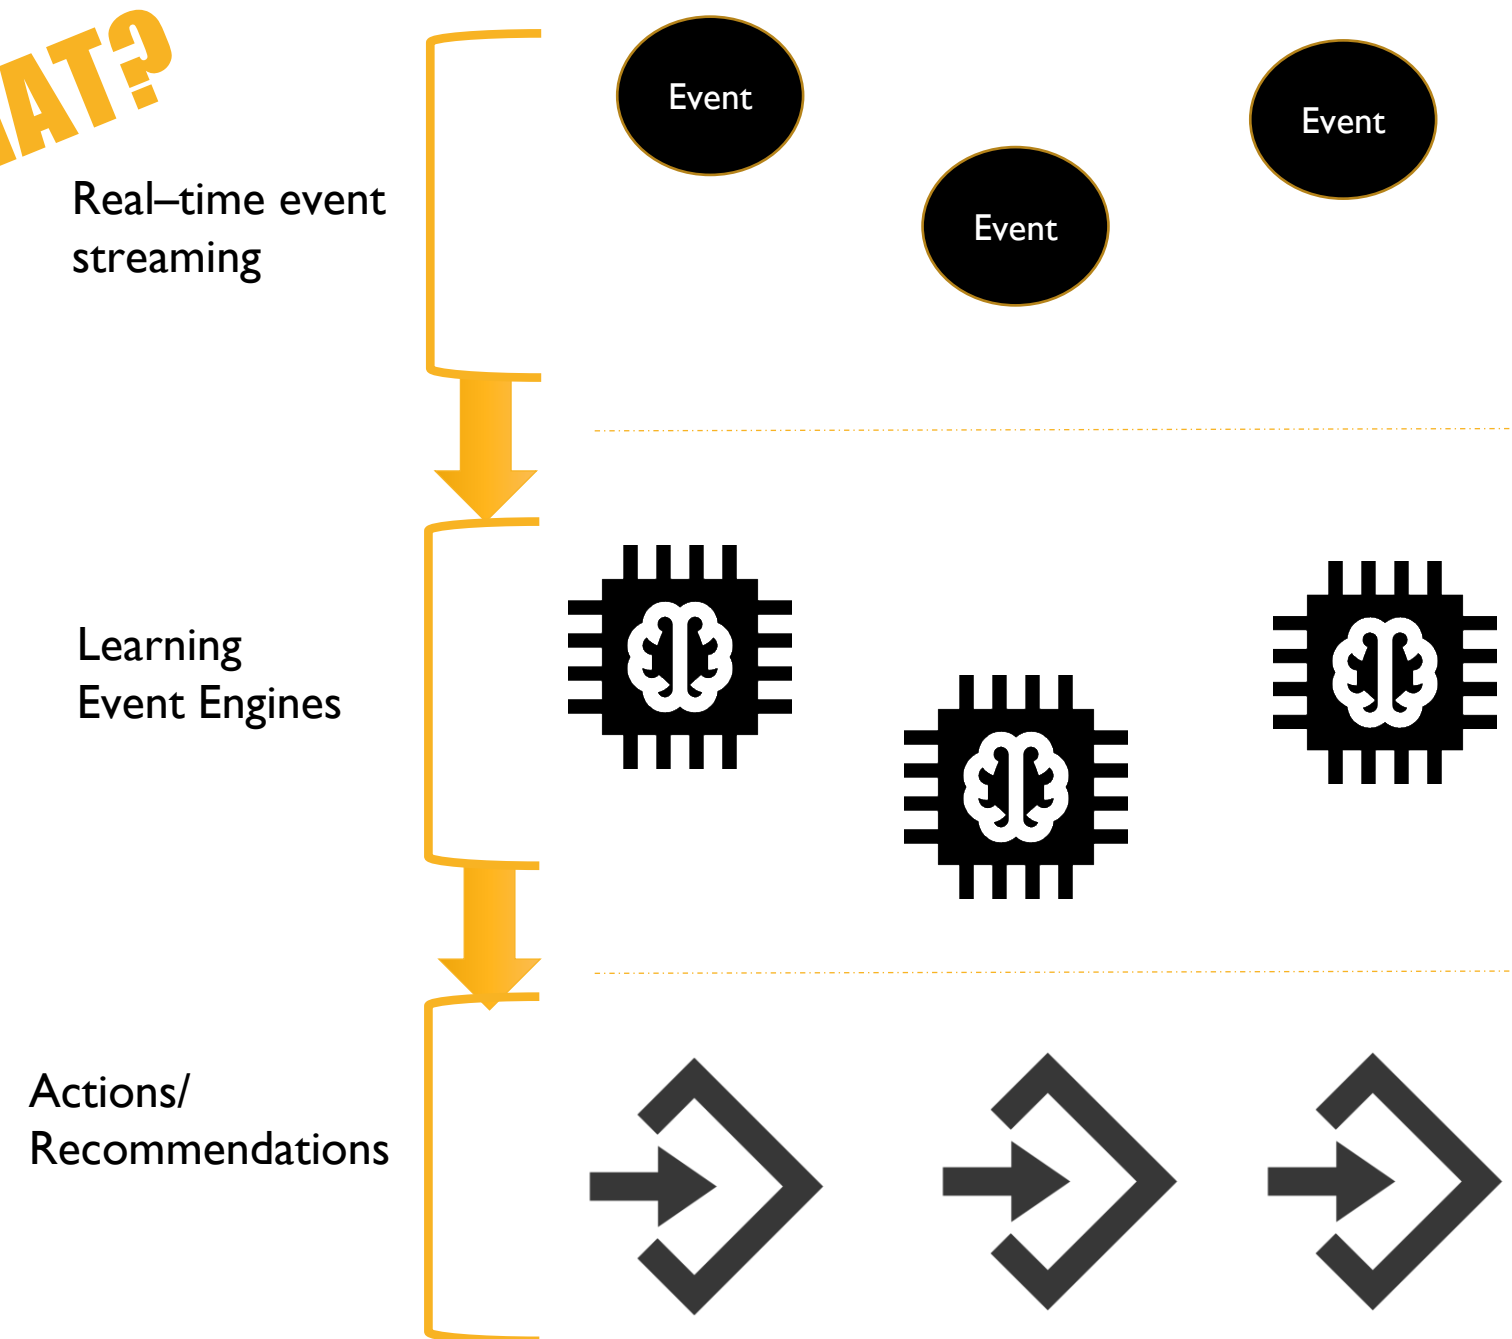

- Open Source tools and middleware platforms,
- Mobile and Embedded Technologies,
- SOA, Java, Cloud

SME, 50+ staff

Proposal Introduction

WHAT?

- Smart stream processing
- Deep learning and IoT integration

Volume - Velocity - Variety

- large volume,
- real-time,
- multiple sourced data processing in embedded platforms with machine learning.

Proposal Introduction

- Actions/recommendations to the users.
- Thread or opportunity detections in devices/systems
Anomaly detection with deep learning techniques
- Wide range usage such as electric vehicles, autonomous driving etc.

Partners

We are looking for any partner to cooperate and improve our work.

Contact Info

For more information and for interest to participate please contact:
